Ban Chiang–
Black burnished incised and cordmarked pot found in the basal levels of the 1974 excavation pit. The small perforations on the rim and base, which are characteristic of many Early Period pots, may have been used to string the pot up so its contents would be out of the reach of scavenger animals.

University Museum Telephones

Area Code 215

General Information	898-4000
Director's Office	898-4050
